Subject Index

Age-hardening characteristics
age-hardening characteristics of a martensitic Fe–Ni–Mn alloy, 233
Alloys
age-hardening characteristics of a martensitic Fe–Ni–Mn alloy, 233
cyclic stress–strain behaviour of austenitic Fe–29.7Mn–8.7Al–1.04C alloy at room temperature, 195
effects of lithium loss on strength and formability of aluminum–lithium alloys 8090 and 8091, 219
high-strain deformation processing of Ni–W alloys, 209
Aluminium
deformation of copper and Cu–Al alloys thermally charged with hydrogen, 203
effects of lithium loss on strength and formability of aluminum–lithium alloys 8090 and 8091, 219
microstructure and bonding of dynamically consolidated aluminum and Al–14Co powders, 225
Annealing temperature
effect of intercritical annealing temperature on equilibrium between ferrite and austenite, L1
Austenite
effect of intercritical annealing temperature on equilibrium between ferrite and austenite, L1

Back stress concept
back stress concept in power law creep of metals: a review, 79
Bismuth telluride
effects of plastic bending strain on the thermoelectric properties of bismuth telluride, 259

Coatings
microstructures and crystallographic relationships in aluminized coating on IN713LC and MAR-M247, 243
Cobalt
microstructure and bonding of dynamically consolidated aluminum and Al–14Co powders, 225
Copper
deformation of copper and Cu–Al alloys thermally charged with hydrogen, 203
Corrosion
fractography of stress corrosion cracking of 310 stainless steel: crystallographic aspects and the influence of the stress intensity factor, 155
Creep
back stress concept in power law creep of metals: a review, 79
Crystallographic aspects
fractography of stress corrosion cracking of 310 stainless steel: crystallographic aspects and the influence of the stress intensity factor, 155
Crystallographic relationships
microstructures and crystallographic relationships in aluminized coatings on IN713LC and MAR-M247, 243

Deformation
high-strain deformation processing of Ni–W alloys, 209
Ductility
effect of microstructure and stain rate on the stage III strain hardening and ductility of dual-phase steels, 183
effects of temperature and strain rate on the plastic flow and ductility of ultrafine-grained type 316 austenitic stainless steel, 93

Electron beam surface melting
model for vorticity-generated segregation during electron beam surface melting, 251
Eutectics,
low cycle fatigue of two nickel-base aligned eutectics, 121

Fatigue
low cycle fatigue of two nickel-base aligned eutectics, 121
phenomenological model of the mechanical properties of microplastic surface grains during fatigue, 137
Ferrite
effect of intercritical annealing temperature on equilibrium between ferrite and austenite, L1
Formability
effects of lithium loss on strength and formability of aluminum–lithium alloys 8090 and 8091, 219
Fracture
mechanics and micromechanics of fracture, 9
microstructural and microscopic aspects of fracture, 17
Fracture micromechanisms
novel experimental techniques for the study of fracture micromechanisms, 31

Grains
A phenomenological model of the mechanical properties of microplastic surface grains during fatigue, 137

Iron
age-hardening characteristics of a martensitic Fe–Ni–Mn alloys, 233

Lithium
effects of lithium loss on strength and formability of aluminum–lithium alloys 8090 and 8091, 219

© Elsevier Sequoia/Printed in The Netherlands

Loading conditions
dynamic recrystallization under changing loading conditions, 147
Low cycle fatigue
low cycle fatigue of two nickel-base aligned eutectics, 121

Manganese
age-hardening characteristics of a martensitic Fe–Ni–Mn alloy, 233
Mechanical properties
quantitative determination of the microstructure of high strength structural steels for correlation with their mechanical properties, 71
Mechanics
mechanics and micromechanics of fracture, 9
Metals
back stress concept in power law creep of metals: a review, 79
Micromechanics
mechanics and micromechanics of fracture, 9
Microplastic surface grains
phenomenological model of the mechanical properties of microplastic surface grains during fatigue, 137
Microscopic aspects
microstructural and microscopic aspects of fracture, 17
Microstructural aspects
microstructural and microscopic aspects of fracture, 17
Microstructure
effect of microstructure and stain rate on the stage III strain hardening and ductility of dual-phase steels, 183
microstructure and bonding of dynamically consolidated aluminum and Al–14Co powders, 225
microstructures and crystallographic relationships in aluminized coatings on IN713LC and MAR-M247, 243
microstructure–strength relations in a duplex stainless steel, 175
quantitative determination of the microstructure of high strength structural steels for correlation with their mechanical properties, 71

Nickel
age-hardening characteristics of a martensitic Fe–Ni–Mn alloys, 233
low cycle fatigue of two nickel-base aligned eutectics, 121

Plastic bending strain
effects of plastic bending strain on the thermoelectric properties of bismuth telluride, 259
Plastic flow
effects of temperature and strain rate on the plastic flow and ductility of ultrafine-grained type 316 austenitic stainless steel, 93
Powders
microstructure and bonding of dynamically consolidated aluminum and Al–14Co powders, 225
Power law creep
the back stress concept in power law creep of metals: a review, 79

Recrystallization
dynamic recrystallization under changing loading conditions, 147

Stainless steels
discontinuous yielding in ultrafine-grained austenitic stainless steels, 109
effects of temperature and strain rate on the plastic flow and ductility of ultrafine-grained type 316 austenitic stainless steel, 93
fractography of stress corrosion cracking of 310 stainless steel: crystallographic aspects and the influence of the stress intensity factor, 155
microstructure–strength relations in a duplex stainless steel, 175
Steels
effect of microstructure and stain rate on the stage III strain hardening and ductility of dual-phase steels, 183
quantitative determination of the microstructure of high strength structural steels for correlation with their mechanical properties, 71
Strain
cyclic stress–strain behaviour of austenitic Fe–29.7Mn–8.7Al–1.04C alloy at room temperature, 195
effect of microstructure and stain rate on the stage III strain hardening and ductility of dual-phase steels, 183
effects of plastic bending strain on the thermoelectric properties of bismuth telluride, 259
effects of temperature and strain rate on the plastic flow and ductility of ultrafine-grained type 316 austenitic stainless steel, 93
high-strain deformation processing of Ni–W alloys, 209
Strength
effects of lithium loss on strength and formability of aluminum–lithium alloys 8090 and 8091, 219
Stress
back stress concept in power law creep of metals: a review, 79
cyclic stress–strain behaviour of austenitic Fe–29.7Mn–8.7Al–1.04C alloy at room temperature, 195
fractography of stress corrosion cracking of 310 stainless steel: crystallographic aspects and the influence of the stress intensity factor, 155
Stress corrosion cracking
fractography of stress corrosion cracking of 310 stainless steel: crystallographic aspects and the influence of the stress intensity factor, 155
Stress intensity factor
fractography of stress corrosion cracking of 310 stainless steel: crystallographic aspects and the influence of the stress intensity factor, 155

Thermoelectric properties
effects of plastic bending strain on the thermoelectric properties of bismuth telluride, 259
Tungsten
high-strain deformation processing of Ni–W alloys, 209

Vorticity-generated segregation
model for vorticity-generated segregation during electron beam surface melting, 251

MATERIALS SCIENCE AND ENGINEERING VOL. 94 OCTOBER 1987

CONTENTS

PANEL REPORT ON MICROMECHANICS AND PHYSICS OF FRACTURE

Executive summary 7
V. Vitek (Philadelphia, PA, U.S.A.)

Mechanics and micromechanics of fracture 9

Microstructural and microscopic aspects of fracture 17

Novel experimental techniques for the study of fracture micromechanisms 31

Interatomic forces and cohesion in solids 61

Quantitative determination of the microstructure of high strength structural steels for correlation with their mechanical properties 71
H. G. Hillenbrand and P. Schwaab (Duisberg, F.R.G.)

The back stress concept in power law creep of metals: a review 79
J. Čadek (Brno, Czechoslovakia)

The effects of temperature and strain rate on the plastic flow and ductility of ultrafine-grained type 316 austenitic stainless steel 93
R. A. Varin (Waterloo, Ontario, Canada)

Discontinuous yielding in ultrafine-grained austenitic stainless steels 109
R. A. Varin, B. Mazurek and D. Himbeault (Waterloo, Ontario, Canada)

Low cycle fatigue of two nickel-base aligned eutectics 121
N. Bylina and N. S. Stoloff (Troy, NY, U.S.A.)

A phenomenological model of the mechanical properties of microplastic surface grains during fatigue 137
W. L. Morris, M. R. James and B. N. Cox (Thousand Oaks, CA, U.S.A.)

Dynamic recrystallization under changing loading conditions 147
G. Gottstein and S. Deshpande (East Lansing, MI, U.S.A.)

The fractography of stress corrosion cracking of 310 stainless steel: crystallographic aspects and the influence of the stress intensity factor 155
J. I. Dickson, D. Groulx, Li Shiqiong (Montreal, Quebec, Canada) and D. Tromans (Vancouver, B.C., Canada)

Microstructure–strength relations in a duplex stainless steel 175
K. Unnikrishnan and A. K. Mallik (Bombay, India)

The effect of microstructure and strain rate on the stage III strain hardening and ductility of dual-phase steels 183
M. S. Nagorka (Spokane, WA, U.S.A.), G. Krauss and D. K. Matlock (Golden, CO, U.S.A.)

Cyclic stress–strain behaviour of austenitic Fe–29.7Mn–8.7Al–1.04C alloy at room temperature 195
N. J. Ho and S. C. Tjong (Kaohsiung, Taiwan)

Deformation of copper and Cu–Al alloys thermally charged with hydrogen 203
Yi Pan and J. G. Byrne (Salt Lake City, UT, U.S.A.)

High-strain deformation processing of Ni–W alloys 209
Y. Leng, T. H. Courtney and J. C. Malzahn Kampe (Houghton, MI, U.S.A.)

Effects of lithium loss on strength and formability of aluminum–lithium alloys 8090 and 8091 219
J. M. Papazian, G. G. Bott and P. Shaw (Bethpage, NY, U.S.A.)

Microstructure and bonding of dynamically consolidated aluminum and Al–14Co powders 225
R. N. Wright, T. E. Doyle, J. E. Flinn and G. E. Korth (Idaho Falls, ID, U.S.A.)

Age-hardening characteristics of a martensitic Fe–Ni–Mn alloy 233
J. Singh and C. M. Wayman (Urbana, IL, U.S.A.)

Microstructures and crystallographic relationships in aluminized coatings on IN713LC and MAR-M247 243
S. L. Hwang and P. Shen (Kaohsiung, Taiwan)

A model for vorticity-generated segregation during electron beam surface melting 251
A. Tauqir, P. R. Strutt and P. G. Klemens (Storrs, CT, U.S.A.)

The effects of plastic bending strain on the thermoelectric properties of bismuth telluride 259
M. Desai, L. S. Goh, H. J. Goldsmid, L. B. Harris and V. R. Howes (Kensington, Australia)

BOOK REVIEWS 265

CONFERENCE CALENDAR 271

LETTER

Effect of intercritical annealing temperature on equilibrium between ferrite and austenite L1
M. C. Chaturvedi and A. K. Jena (Winnipeg, Manitoba, Canada)
